

**Q. WHAT IS A HYGOMAT RUNNER?**

**A.** A Hygomat runner is a disposable mat treated with a non-toxic antimicrobial agent that is placed on carpets or floors to reduce slip and fall accidents and to stop dirt, debris, and harmful allergens and bacteria's from being tracked into a facility.

**Q. WHAT SIZES AND STYLES ARE AVAILABLE?**

**A.** Hygomat runners are available in either a carpet or floor model style. They come in an attractive charcoal black color that hides dirt and stains associated with foot traffic. Standard sizes are 24" x 25," "24" x 36," "24" x 48," and 24" x 72." Custom sizes and private labeling available upon request. Private labeling will not affect the integrity or effectiveness of the product.

**Q. HOW DOES IT SECURE TO THE FLOOR?**

**A.** Floor model adheres to the floor quickly and easily with double sided tape and carpet model uses a sturdy Velcro strip.

**Q. WHAT ARE THE BENEFITS OF USING HYGOMAT?**

**A.** Hygomat runners capture and stop harmful allergens, molds, and bacteria's that are tracked and carried into a building by the soles of shoes. Unlike an ordinary floor runner that is a breeding ground for these unwanted elements, the treated Hygomat runner can destroy up to 99% of these germs on contact. The Hygomat runner will also prolong the life your floor or carpet that can become worn out or damaged due to high foot traffic. It also reduces maintenance, labor costs, and slip and fall liabilities.

**Q. WHAT MAKES HYGOMAT BETTER THAN OTHER RUNNERS?**

**A.** The original Hygomat runner was trademarked in 2004 by Hygolet, Inc. and remains the premier mat provider in the market today. Unlike other runners, Hygomat stays in place, will not discolor or show stains, and permanently kills odors caused by bacteria rather than masking it with a fragrance.

**Q. WHAT IS THE ANTIMICROBIAL AGENT USED ON THE HYGOMAT?**

**A.** Each Hygomat runners is treated with Ultra-Fresh, an environmentally safe and non-toxic antimicrobial agent that is found in many common household items such as pantyhose, sheets, socks, and towels. The effectiveness of the agent lasts throughout the life of the runner (approximately 3 months) and does not require any additional reapplication.

**Q. HOW LONG WILL MY HYGOMAT RUNNER WORK?**

**A.** Each runner is sprayed with the antimicrobial agent before it is shipped out for maximum effectiveness and can last upward of 3 months. In high traffic areas, it may need to be changed more frequently.

**Q. IS THE HYGOMAT ENVIRONMENTLY FRIENDLY?**

**A.** We spray each and every runner with a computerized process to ensure that each runner gets an equal measure of treatment. The product is intended to be disposable through standard waste management procedures and our Materials and Safety Data analysis shows no harmful material to the environment in the product.

**Q. WHERE CAN HYGOMAT RUNNERS BE USED:**

**A.** They are perfect for places such as senior citizen homes, hospitals, doctor's offices, building entrances, airports, schools, and anywhere else floor safety and protection is of utmost importance.
